### RECYCLING FACTS

*\*Recycling 1 ton of paper saves 17 mature trees, 7,000 gallons of water, 3 cubic yards of landfill space, 2 barrels of oil, and 4000 kilowatt hours of electricity. This is enough energy to power the average American home for 5 months.*

*\*Approximately 88% of the energy is saved when plastic is made from recycled plastic rather than from the raw materials of gas and oil.*

*\*We use over 80,000,000,000 aluminum soda cans every year. Recycling one aluminum can saves enough energy to run a television for 3 hours. (EPA)*
