Booking Kiosk

The booking kiosk is a peripheral device that attaches via USB cable to a computer running the accounting software. The kiosk's money acceptor is activated from within the accounting software when an officer deposits money to an inmate's account. The kiosk accepts bills and coins, automatically counts them and totals the amount, then the officer commits the deposit transaction and a receipt is printed.

Inmate POD Kiosks

The kiosk is designed to allow inmates to enter their order and adjust it as often as they would like up to the scheduled time for processing orders, **without regard for the inmate's account balance**. Once the cutoff time is reached all orders will be processed, and at that time, the inmate account balance, as well as facility rules and restrictions will be applied. After all requests are processed, orders are built and dispatched to the distribution center (remote or local) for fulfillment.

Kiosks must be built with the safety of the inmate and security of the facility in mind. All enclosures shall be made from at minimum, 11 gauge steel and rounded at each corner. The touch screen will be required to be made from shatter-proof material, and the locks must be high security (tamperproof) vending machine style locks. All kiosks will be wall-mounted and are easily converted to floor stand-alone models, if desired.

An Inmate ID number and self-assigned PIN are needed to gain access to the kiosk. The pin number is able to be reset by either the inmate or an authorized facility administrator as often as necessary.

The application offers the ability to allow the facility to customize the functions available to the inmate population when accessing the kiosk, such as inmate requests/grievances, hair cut requests, policy and procedures postings, FAQ's by counselors, etc. Other software capabilities shall include access to:

Account History:

Fully integrated with the accounting system, the feature shall provide an account history transaction screen. After logging in, the inmate simply touches the option to view their entire history of account transactions and running balance. The transactions are conveniently listed by entry date, in descending order.

Order Entry:

Placing a commissary and/or indigent order request is simple and accurate. The inmate touches the option to open the commissary screen. A wide assortment of products is available from this screen; however, preset restrictions ensure that inmate views only the items he or she is authorized to order.

Each item features a picture to improve the accuracy of the product selected, and the quantity is entered by touching the corresponding number on the touch screen number pad.

The Jefferson County Jail will have the ability to display specials, on site products, indigent and miscellaneous items, simply from a touch screen. Each item selected is displayed onscreen in an order ticket that can be edited during the ordering process.

Facility Information:

The Kiosk is a multipurpose tool that will allow the facility to post information such as answers to the most frequently asked questions. Users touch an information button to display important facility information such as daily commissary specials, facility policies and procedures, and any other information preset and determined by the facility.

Grievance/Calendar/Request Appointment:

This feature allows inmates to submit requests electronically. After the facility configures the types of requests that the inmate is allowed to submit, the inmate will be able to logon to the kiosk and submit the requests. Inmates will also be able to view their calendar. The facility is able to post static calendar information as well as all approved inmate appointments that are a direct result of an electronic request through IJMS.

Commissary List

Suppliers shall submit a comprehensive list of commissary items and cost for review and consideration. Percentage profit/return to the Jefferson County Jail must be submitted.

Installation of Technology/Kiosks

Suppliers will be responsible for costs associated with installation, electric, and software necessary for successful implementation of (Secure Deposit Services (phone, web, and lobby kiosk), booking kiosk and inmate Edge Kiosks). The server will be added to the County’s network to allow the Jail’s workstations and inmate Edge Kiosks to communicate back to the suppliers database / web server. Supplier will install new server hardware, perform software upgrade on new server, and ensure that all existing software functionality is working once the hardware / software upgrade is complete. The supplier will install booking kiosk hardware to the designated Jail workstation or supplier workstation. The supplier will install and configure booking kiosk software, test/verify functionality of the booking/cash kiosk in the booking area, and train end user facility staff on the booking kiosk software functionality. The supplier will facilitate the installation of all install and configurations to implement the inmate Kiosk software on the server. The supplier will finalize all configurations required at each inmate Edge Kiosk to allow for the kiosks to communicate back to the supplier server.
